Holi-Dazed is a running game inspired by the Google Dinosaur Game. Users play as Santa Claus. The objective of the game is to jump over trees and reach 100 points. Once that score is reached, you win the game.

Requirements to Run This Game

- A computer with a working keyboard

- Python 3.7+

In order to play this game, you will need to do the following:

Step One- Install Python: Make sure your device has **Python 3.7** or above installed.

   To install python, go to python.org.

   To check whether your system has the required version:

Windows- 1) Right click on the Start button and select Windows PowerShell/ Windows PowerShell (admin) **OR** press the Windows key, type in "PowerShell", and press Enter.

          2) Type in the following command: python --version.

MacOS- 1) Open Finder and navigate to Applications → Utilities → Terminal **OR** press the cmd + space key, type in "Terminal", and press Enter.

          2) Type in the following command: python3 --version.

   If you have a python program installed, then the command will respond with a version number.

   If it is later than Python 3.7, update your program.

Step Two- Install Holi-Dazed.

   1. Download the .zip file under the name "Holi-Dazed.zip".

   2. Unzip the file.

3. Open "Holi-Dazed".

Step Three- How to Play

Once you open the program, it will open a Title Screen window with a Start and Quit button. Press Start to begin the game. This will close the first window and open a new window. The score will start counting at the top of the screen, signalling the beginning of the game.

To access the controls, click on the new window.

You are playing as Santa Claus, and your objective is to jump over the trees. To do this, press the Space key on your keyboard. If Santa comes into close proximity with a tree, you lose the game. You will have the option to Return To Title Screen or to Quit.

To beat the game, your score must reach 100. Once that happens, you are led to a congratulatory page. Give yourself a pat on the back.
